EDUCATION

Technical University of Munich (TUM)

Munich, Germany

B.Sc. Computer Science Major — Math Minor (4th Semester)

Oct. 2024 – 2027 (projected)

- **Relevant Coursework:** Introduction to Software Engineering (EIST), Databases, Algorithms & Data Structures, Linear Algebra, Analysis, Probability Theory.
- **Focus:** Backend Development, System Architecture and Mathematical Algorithms.

Niedersächsisches Studienkolleg

Hannover, Germany

University Preparation (T-Course: Technology/Math/CS)

Apr. 2023 – Feb. 2024

- Final Grade: 1.5

EXPERIENCE

PixelComputer GmbH

Munich, Germany

Working Student – Hardware & Software Installation

Oct. 2025 – Dec. 2025

- Assisted in software configuration and system environment setup.
- Installed and configured operating systems (Windows/Linux) for client environments.
- Conducted technical error analysis and hardware assembly.

Bestnote GmbH

Hannover, Germany

Private Tutor (STEM Subjects)

May 2024 – Sep. 2024

- Taught Mathematics and German to students aged 9 to 18.
- Translated complex technical concepts into accessible language, enhancing communication skills.

PROJECTS

Seminar "AI Testing Landscape"

April 2026 – ongoing

- A paper research work within university curriculum on the autonomus AI testing methods in co-operation with BMW.
- *Key Points:* Latent Space Class Dispersion (LSCD), Coverage-Guided Fuzzing, Metamorphic Testing.

Code Optimizer (Greenifier) | TypeScript, Python

Mar 2026 – April 2026

- Engineered an AI-powered code optimization web app that improved runtime efficiency by integrating Gemini AI with React and FastAPI services.
- Connected frontend, backend, and LLM pipelines using *React*, *FastAPI*, *Docker* and *Render*.

Personal Portfolio Website | HTML5, CSS3, JavaScript

Jan. 2026

- Designed and developed a responsive portfolio website to showcase academic and professional milestones.
- Implemented a custom grid layout and multi-language support (English/German/French).
- Optimized for mobile devices using CSS media queries and flexbox.

Secure Memory Unit (SMU) Simulation | C/C++, Computer Architecture

Jun. 2025 – Aug. 2025

- Built a C-based memory safety module as part of a CPU simulation within university curriculum team project.
- Implemented control logic, latency simulation, parity checks, and error injection tests.
- *Note:* Code available upon request (private repository due to university regulations).

TECHNICAL SKILLS

Programming Languages: Java, Python, C/C++, OCaml, SQL, TypeScript

Tools & Automation: Git, REST APIs, Linux (WSL), React, Prompt Engineering (Basics), Docker

Languages: German (C1), English (C1), Ukrainian (Native), Russian (Native), French (A2)
